Annex 1:	National tag clearing houses to which Atlantic salmon tags should be returned.....	130

1 Terms of Reference

The Terms of Reference for the 2023 Working Group on North Atlantic Salmon (ICES C. Res. 2022/2/FRSG17) stated that the group would:

“provide an overview of salmon catches and landings by country, including unreported catches and catch and release, and production of farmed and ranched Atlantic salmon in 2021 and 2022;¹”

Data were provided by Working Group members for national tagging programmes, as far as possible including all agencies and organisations. The compilations for 2021 are presented by country together with a summary of the tags and marks by all countries in Table 1. A list of national tag clearing houses is given in Annex 1.

¹ With regard to ToR 1.1, for the estimates of unreported catch the information provided should, where possible, indicate the location of the unreported catch in the following categories: in-river; estuarine; and coastal. Numbers of salmon caught and released in recreational fisheries should be provided.

2 Summary table

Summary of Atlantic salmon tagged and marked in 2021 - 'Hatchery' and 'Wild' juvenile refer to smolts and parr.

Country	Origin	Primary Tag or Mark				Total
