Subject: Clarification to *Call for data: information on Vulnerable Marine Ecosystems (VME) in the North Atlantic from ICES member countries from 2004 to 2014* (published 10 June 2015¹)

Telephone: (45) 33 38 67 00
Telefax: (45) 33 93 42 15
E-mail: info@ices.dk
www.ices.dk

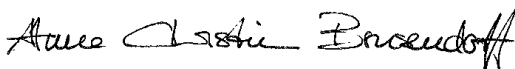

Dear Reader,

With respect to the above named ICES data call, the following point of clarification is made.

In the data call, there is a statement that “This database [ICES VME database] aims to store all known VME indicator records in the North Atlantic (covering deep water areas inside and outside national jurisdiction) for use by ICES and the wider marine community. In addition, the database also holds information on bona fide records of VME habitats”. WGDEC focuses its work on VME in ‘deep water areas’, considered to be in **water depths of 200m and deeper**, thereby effectively excluding data from the following ICES areas: IVb, IVc, VIIa, VIIId, VIIe, VIIIf and VIIg.

In case of questions please contact WGDEC Chair Neil Golding (neil.golding@jncc.gov.uk) or the ICES Secretariat (accessions@ices.dk) for clarification.

Sincerely,
