# 100 Years of Science under ICES

## Contents

E. D. Anderson	Introduction	1
R. R. Dickson	Epitaph, Helsinki	7
J. Møller Christensen	An ICES Statutory Meeting in the late 1950s	8
	List of referees	12
I. SCIENTIFIC AND POLITICAL PRECURSORS OF THE LATE 19TH CENTURY FACILITATING THE ESTABLISHMENT OF ICES, AND SUBSEQUENT SCIENTIFIC AND POLITICAL EVENTS INFLUENCING THE CONTINUED EVOLUTION OF ICES		
J. Smed and J. Ramster	Overfishing, science, and politics: the background in the 1890s to the foundation of the International Council for the Exploration of the Sea	13
H. M. Rozwadowski	Survival and evolution of ICES in a changing world	22
S. Laakkonen	Finland and ICES: K. M. Levander and the origins of hydrobiological studies	32
V. Schwach	Internationalist and Norwegian at the same time: Johan Hjort and ICES	39
J. A. Adams	The Fishery Board for Scotland and its participation in international investigations	45
A. J. van Bennekom, S. J. de Groot, and L. Otto	Dutch involvement in fisheries research prior to and in early ICES	56
J. A. Lajus	"Foreign science" in Russian context: Murman Scientific-Fishery Expedition and Russian participation in early ICES activity	64
P. Solemdal and V. Serebryakov	Cooperation in marine research between Russia and Norway at the dawn of the 20th century	73
II. FIELD STUDIES IN HYDROGRAPHY		
J. Meincke	100 years of field work in hydrography: a retrospective of its impacts	87
A. N. Pantiulin	Water masses: birth of the idea	100
A. Svensson	Otto Pettersson's ideas on general ocean circulation	104
S. Morcos	Measuring salinity: ICES link to the scientific community and developing world	113
J. Smed	Martin Knudsen – the oceanographer	124
W. Lenz	ICES involvement in IGY 1957/58 with special emphasis on marine biology	132
S. Fonselius	Hydrographical investigations in the Baltic Sea area before the founding of ICES	138
S. Bacon	The dense overflows from the Nordic Seas into the deep North Atlantic	148
III. GROWTH OF THE THEORY OF PLANKTON PRODUCTION AND LINKS TO FISH RECRUITMENT		
K. Richardson	Linking plankton and fish production throughout the history of ICES	156

#### IV. CONTAMINANTS IN THE MARINE ENVIRONMENT: THE ICES ROLE IN DEVELOPING METHODOLOGY AND COORDINATING SCIENTIFICALLY BASED ADVICE

A. D. McIntyre	Assessing the health of the seas: the ICES contribution	164
H. L. A. Sonneveldt, J. W. Baretta, and R. W. P. M. Laane	Dealing with uncertainty in water quality models of the North Sea	172
S. M. Rowlatt	The use of sediments in pollution studies	179
R. F. Addison	Whither "biological effects monitoring"?	184
A. Bignert	The power of ICES contaminant trend monitoring	195
T. Lang	Fish disease surveys in environmental monitoring – the role of ICES	202

#### V. VARIABILITY AT ALL SCALES AND ITS EFFECT ON THE ECOSYSTEM

R. R. Dickson	Variability at all scales and its effect on the ecosystem – an overview	213
B. R. MacKenzie	Understanding the role of turbulence on fisheries production during the first century of ICES	227
B. Planque and P. C. Reid	What we have learned about plankton variability and its physical controls from 70 years of CPR records	237
O. Nakken	Understanding environmental controls on fish stocks and progress towards their inclusion in fish stock assessment	247
K. F. Drinkwater	Ocean climate: from regional variability to global change	256
F. E. Werner and J. A. Quinlan	Fluctuations in marine fish populations: physical processes and numerical modelling	264
O. Cendrero	Sardine and anchovy crises in northern Spain: natural variations or an effect of human activities?	279
C. R. Weidman	The growing capability of proxy ocean temperature data from months to millennia	286

#### VI. THE NOTION THAT FISH FORM STOCKS

M. M. Sinclair and T. D. Smith	The notion that fish species form stocks	297
R. L. Stephenson	Stock structure and management structure: an ongoing challenge for ICES	305
D. L. Lajus	Long-term discussion on the stocks of the White Sea herring: historical perspective and present state	315
D. H. Secor	Historical roots of the migration triangle	323

#### VII. OCEAN TRAVELLERS – TRANS-OCEAN FISHERIES AND MIGRATIONS

J. Jakobsson	Ocean travellers	330
A. Lindquist	Herring periods of Bohuslän: a cross-sectoral approach	343
J. C. Holst, O. Dragesund, J. Hamre, O. A. Misund, and O. J. Østvedt	Fifty years of herring migrations in the Norwegian Sea	352
E. Aro	Fish migration studies in the Baltic Sea – a historical review	361
L. P. Hansen and J. A. Jacobsen	Atlantic salmon: the ocean traveller	371
S. A. Iversen	Changes in the perception of the migration pattern of Northeast Atlantic mackerel during the last 100 years	382

## VIII. REARING AND RELEASE

H. Rosenthal	The role of ICES in supporting research in mariculture	391
T. D. Smith, J. Gjosæter, N. C. Stenseth, M. O. Kittilsen, D. S. Danielssen, and S. Tveite	A century of manipulating recruitment in coastal cod populations: the Flødevigen experience	402
D. Minchin	The potential for ranching the scallop, <i>Pecten maximus</i> – past, present, and future: problems and opportunities	416
B. R. Howell and T. Ellis	Rearing marine fishes for release into the sea	424
J. E. Stewart and A. H. McVicar	An historical perspective on ICES studies of diseases of marine and diadromous animals	432

IX. REALIZING THE BASIS FOR OVERFISHING AND  
QUANTIFYING FISH POPULATION DYNAMICS

Ø. Ulltang	Realizing the basis for overfishing and quantifying fish population dynamics	443
R. J. H. Beverton and E. D. Anderson	Reflections on 100 years of fisheries research	453
S. J. Holt	ICES involvement in whaling and whale conservation, and implications of IWC actions	464
T. D. Smith	The Woods Hole bottom-trawl resource survey: development of fisheries-independent multispecies monitoring	474
P. G. Fernandes, F. Gerlotto, D. V. Holliday, O. Nakken, and E. J. Simmonds	Acoustic applications in fisheries science: the ICES contribution	483
S. J. Walsh, A. Engås, R. Ferro, R. Fonteyne, and B. van Marlen	To catch or conserve more fish: the evolution of fishing technology in fisheries science	493
R. L. Stephenson and K. J. Clark	The role of ICES herring investigations in shaping fisheries science and management	504
G. Sætersdal	From fisheries research to fisheries science, 1900–1940. The Bergen and the ICES scenes: tracing the footsteps of Johan Hjort	515
D. W. Skagen and K. H. Hauge	Recent development of methods for analytical fish stock assessment within ICES	523
R. Toresen and O. J. Østvedt	Stock structure of Norwegian spring-spawning herring: historical background and recent apprehension	532
A. Hylen	Fluctuations in abundance of Northeast Arctic cod during the 20th century	543

## X. ICES AS A FISHERY ADVISORY BODY

D. de G. Griffith	ICES as a fishery advisory body	551
R. Toresen and J. Jakobsson	Exploitation and management of Norwegian spring-spawning herring in the 20th century	558
S. Engesæter	The importance of ICES in the establishment of NEAFC	572
E. Ojaveer	The role of ICES in the assessment and management of resources in the Baltic Sea	582

## XI. MAJOR SCIENTIFIC CONTRIBUTIONS BY ICES

G. Hempel	ICES contributions to marine science – an overview	590
-----------	----------------------------------------------------	-----

## XII. GRAND CHALLENGES FOR ICES

W. S. Wooster	Grand challenges for ICES: view from the West	597
J. C. Rice	ICES – complexity in science and advice	601
S. Parsons	The future of ICES in the 21st century	605

# ICES Marine Science Symposia

## Actes du Symposium

This series, known until 1991 as *Rapports et Procès-Verbaux des Réunions*, contains the scientific papers and proceedings of symposia or other special meetings held under the auspices of the International Council for the Exploration of the Sea. Volumes in this series have been published since 1903 and many of them are still available. Since 1995 most of these volumes have been included in the series *ICES Journal of Marine Science*. A list of titles with current prices may be obtained from the Secretariat of the Council.

The latest volumes are as follows:

- |             |                                                                                                                                                                                                             |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Volume 214: | Recruitment Dynamics of Exploited Marine Populations: Physical-Biological Interactions. Part 2. (Baltimore, Maryland, 1997). ICES Journal of Marine Science, vol. 58, no. 5. 2001. DKK 360.00               |
| Volume 213: | Environmental Effects of Mariculture. (St Andrews, New Brunswick, 1999). ICES Journal of Marine Science, vol. 58, no. 2. 2001. DKK 340.00                                                                   |
| Volume 212: | Population Dynamics of <i>Calanus</i> in the North Atlantic. (Tromsø, 1999). ICES Journal of Marine Science, vol. 57, no. 6. 2000. DKK 700.00                                                               |
| Volume 211: | Marine Benthos Dynamics: Environmental and Fisheries Impacts. (Crete, 1998). ICES Journal of Marine Science, vol. 57, no. 5. 2000. DKK 500.00                                                               |
| Volume 210: | Ecosystem Effects of Fishing. (Montpellier, 1999). ICES Journal of Marine Science, vol. 57, no. 3. 2000. DKK 640.00                                                                                         |
| Volume 209: | Recruitment Dynamics of Exploited Marine Populations: Physical-Biological Interactions. Part 1. (Baltimore, Maryland, 1997). ICES Journal of Marine Science, vol. 57, no. 2. 2000. DKK 550.00               |
| Volume 208: | Brackish Water Ecosystems. (Helsinki, 1998). ICES Journal of Marine Science, vol. 56 Supplement. 1999. DKK 500.00                                                                                           |
| Volume 207: | Confronting Uncertainty in the Evaluation and Implementation of Fisheries-Management Systems. (Cape Town, 1998). ICES Journal of Marine Science, vol. 56, no. 6. 1999. DKK 550.00                           |
| Volume 206: | The Temporal Variability of Plankton and Their Physico-Chemical Environment. (Kiel, 1997). ICES Journal of Marine Science, vol. 55, no. 4. 1998. DKK 500.00                                                 |
| Volume 205: | Interactions between Salmon Culture and Wild Stocks of Atlantic Salmon: The Scientific and Management Issues. (Bath, 1997). ICES Journal of Marine Science, vol. 54, no. 6. 1997. DKK 500.00. Out of print. |
