Terms of reference for the 1990 ICES North Atlantic Salmon Working Group state that the Group should:

"With respect to Atlantic salmon in the NASCO area, prepare a compilation of microtag, finclip, and external tag releases within ICES member countries in 1989".

Data were provided by Working Group members for national tagging programmes, as far as possible including all agencies and organizations. These compilation data are presented by country, together with a summary of the tags and finclips applied by all countries (Table 1). Data were supplied on the standard form agreed by the Working Group in 1988. A list of national tag clearing houses is also given (Appendix 1).

Table 1 Number of microtags, external tags, and finclips applied to Atlantic SALMON by countries for 1989.

Country	Stock	Microtags	External tags	Finclips	Comments
Canada	Hatchery	59,178	53,490	1,026,082	33,508 Carlin tagged also with adipose clip
